-
3	K R	Quick question how can I assign owner role to a resource group if I want to give controlled privileges for a certain period how can I do that
  - You can use PIM (Privileged Identity Management). See https://learn.microsoft.com/en-us/entra/id-governance/privileged-identity-management/pim-configure
-
11	K S	How can you manage 100s of NSGs?
  - You can consider Azure Virtual Network Manager. See https://learn.microsoft.com/en-us/azure/virtual-network-manager/concept-security-admins
  - https://learn.microsoft.com/en-us/azure/virtual-network-manager/overview
-
13	D D	Also could you please explain the Azure bastion services? and use case and demo?
  - "Azure Bastion is a fully managed PaaS service that you provision to securely connect to virtual machines via private IP address.". Please see https://learn.microsoft.com/en-us/azure/bastion/bastion-overview for details
  - We will have a Bastion demo tomorrow (day 2)

Thanks!
Reza
